There are 230 taps with 229 paying taps in the District. With the wells (300 gallons per minute water right) and cisterns (200,000 gallons storage) the District currently has- the maximum tap capacity is 266. There are 36 additional pieces of property within the district boundaries eligible to receive water. Of these, 24 parcels of property did pay the original RID's and are entitled to water service by paying the tap/meter pit installation fee. The remaining 12 property parcels did not pay the original RID's and therefore need to pay a fee***

***Property within District, RID not previously paid 1 Acre \$4,842.00
Regardless of actual acreage – fee is for 1 acre
